..... WHEAT

..... OATS

..... PORK

..... POULTRY

..... EGGS

..... HONEY

..... MAPLE SYRUP

LEGEND

This map is a teaching device to supplement courses of social studies in schools and nutrition classes generally, by showing the areas in Canada in which foods are produced. Certain products, such as wheat, are main crops throughout entire regions like the Prairie Provinces, and these products are given in definite lists. In addition, symbols are shown in certain places to indicate areas having a specialized production of the food shown.

Green areas indicate approximate location of farm and ranch lands.

Details were obtained by the Nutrition Division, Department of National Health and Welfare from the Economics Division of the Department of Fisheries and the Marketing Service of the Department of Agriculture.

Fish

Numerals mark the location of the most important fisheries
